Welcome from Dr. Bianca Zenor, Director of the Veterinary Nursing Program

Welcome to the Veterinary Nursing Program, the undergraduate program in the Purdue College of Veterinary Medicine. The College educates the entire veterinary team. Our students are educated alongside Doctor of Veterinary Medicine students in the Veterinary Teaching Hospital (VTH). Veterinary Nursing students complete 1,200 clinical hours in the VTH, providing hands-on, practical care to patients. I am excited that you are exploring the Veterinary Nursing majors and am looking forward to helping you plan your career in veterinary nursing.

Overview

Purdue University's Veterinary Nursing Program is accredited by the American Veterinary Medical Association (AVMA). In order to practice as a credentialed (RVT, CVT, LVT) veterinary technician/nurse, most states require applicants be graduates of an accredited veterinary technology program and have passed the Veterinary Technician National Exam (VTNE). As a credentialed veterinary technician, the graduate is qualified to legally perform medical and surgical nursing, nurse-anesthetist duties, imaging, laboratory testing and dental hygiene as a member of a veterinary team. Specialty certifications are available in many subspecialties. For further information, see www.navta.net.

We offer four degree options:

- Bachelor of Science in Veterinary Nursing
- Associate of Applied Science (on-campus)
- Bachelor of Science in Veterinary Nursing Completion - for graduates of AVMA accredited veterinary technology programs wishing to complete a Bachelor of Science degree.
- Associate of Applied Science (distance learning)

Purdue Advantage:

- Rated #1 in the nation in a listing of the Top 50 Veterinary Technician Programs for 2019 by TheBestColleges.org
- 90% first-time pass rate for the Veterinary Technology National Exam (VTNE)
- Class size is limited to thirty students, keeping the faculty/instructor-to-student ratio below the national average.

Admissions
On-Campus Admission Requirements

- Bachelor of Science in Veterinary Nursing
- Associate of Applied Science (on-campus)
- Bachelor of Science in Veterinary Nursing Completion, for graduates from AVMA accredited veterinary technology programs wishing to complete a Bachelor degree.

Distance Learning Admission Requirements

- Associate of Applied Science (distance learning)

For questions on admissions requirements and procedures, contact the Purdue University Office of Admissions.

Student Services

The role of the College of Veterinary Medicine Student Services Center is to provide for recruitment, admissions, student life and career transition in the College of Veterinary Medicine. Whether you are a prospective student, a current student, or even an alum of our College, please feel free to contact our office and our staff will point you in the right direction. Schedule a Visit to the College of Veterinary Medicine

College of Veterinary Medicine

Veterinary Nursing Program Office

The role of the Veterinary Nursing Program Office is to provide support and assistance to prospective and current students. Whether you are a prospective student, a current student, or even an alum of our College, please feel free to contact our office and our staff will point you in the right direction.

Academic advising is a partnership between the student and advisor. Advisors empower students, assist with goal achievement, and support students with academic and personal concerns. Advisors assist students with the development and implementation of plans for academic success, and personal and career development. Students are proactive and seek assistance. They are informed and review their degree requirements and monitor their academic progress and reach out to their advisors with any questions and concerns.
College of Veterinary Medicine Administration

About the Veterinary Technology Program

Veterinary Technology Education

The Purdue Veterinary Technology program is fully accredited by the American Veterinary Medical Association (AVMA) and is a science based veterinary nursing program offering a Bachelors and Associate of Applied Science degrees.

As an integral part of the veterinary team, veterinary technicians and technologists perform a wide range of veterinary skills:

- Radiology
- Nursing care, including pre and post-surgical care
- Anesthesia
- Client education

While a majority of veterinary technicians and technologists enter the profession in private veterinary practice, there are many other employment opportunities with a Veterinary Technology degree:

- Humane Societies and animal control facilities
- Industry
- Biomedical Research
- Veterinary Supply Sales

Technicians credentialing (certification, licensure, or registration) is required in the majority of states in the United States. Candidates for credentialing must pass a national and/or state examination. Most states require that only graduates of Veterinary Technology programs accredited by the American Veterinary Medical Association (AVMA) are eligible to take the national credentialing exam and to become credentialed Veterinary Technicians.

Associate

Veterinary Nurse Distance Learning, AAS

About the Program

Associate in Applied Science Distance Learning Program

The Veterinary Nurse program is a science-based veterinary nursing program offering an Associates in Applied Science (AAS) degree. The Veterinary Nurse Distance Learning program at Purdue University is designed to allow a student to gain the knowledge, information, and skills necessary to practice as a veterinary technician. It is an AVMA accredited degree. At its completion, the student is eligible to take the Veterinary Technician National Exam (VTNE).

Typically, most students who complete the Distance Learning AAS are already employed with a veterinarian, and plan to continue working in the field. Students are willing to make a long-term commitment to develop the skills and acquire the extensive knowledge required to be a Veterinary Technician.
The curriculum contains 27 didactic courses and 18 clinical mentorships. It is a part-time program and cannot be taken full-time. Financial aid eligibility is limited. Students are responsible for finding their own mentorship sites with a veterinary health care facility.

Most courses are offered every semester, i.e. fall, spring and summer. Courses follow the Purdue class calendar. Students may begin the program at the start of any semester.

More information is on the Purdue College of Veterinary Medicine Veterinary Nursing website.

**Degree Requirements**

**70 Credits Required**

**Departmental/Program Major Courses (65 credits)**

**Required Major Courses (46.5 credits)**

- BMS 11500 - Anatomy For Veterinary Technicians I - DL

• VM 20700 - Small Animal Nursing Clinical Mentorship III-DL
• VM 20900 - Equine Medical Nursing Clinical Mentorship - DL
8 Credits

Semester 7

- CPB 22700 - Microbiology For Veterinary Technicians-DL
- VM 20800 - Large Animal Medical Nursing Clinical Mentorship-DL
- VM 21100 - Food Animal and Equine Anesthesia-Clinical Mentorship-DL
- VM 21300 - Microbiology Clinical Mentorship-DL
- VM 21400 - Parasitology Clinical Mentorship-DL
- VM 21500 - Small Animal Diag Imaging I-Clinical Mentorship-DL
- VM 22900 - Laboratory Animal Health For Veterinary Technicians-DL

8 Credits

Semester 8

- VM 21000 - Small Animal Anesthesia-Clinical Mentorship-DL
- VM 21600 - Small Animal Diag Imaging II-Clinical Mentorship-DL
- VM 21700 - Food Animal and Equine Diagnostic Imaging-Clinical Mentorship
- VM 24500 - Management Topics for Vet Techs I-DL
- VM 24800 - Understanding Animal Disease-DL

7.5 Credits

Semester 9

- ENGL 10600 - First-Year Composition or
- ENGL 10800 - Accelerated First-Year Composition

- VM 22400 - Necropsy Clinical Mentorship For Veterinary Technology
- VM 22500 - Advanced Clinical Mentorship-DL
- VM 22600 - Laboratory Animal Clinical Mentorship-DL
- VM 22800 - Integrations For Veterinary Technicians-DL

8-9 Credits

Notes

- 2.0 Graduation GPA required for Associate in Applied Science degree.
- The Veterinary Nursing Program has additional academic standards.

Critical Course

The ♦ course is considered critical.
In alignment with the Degree Map Guidance for Indiana's Public Colleges and Universities, published by the Commission for Higher Education (pursuant to HEA 1348-2013), a Critical Course is identified as "one that a student must be able to pass to persist and succeed in a particular major. Students who want to be nurses, for example, should know that they are expected to be proficient in courses like biology in order to be successful. These would be identified by the institutions for each degree program”.

Disclaimer

The student is ultimately responsible for knowing and completing all degree requirements.

The myPurduePlan powered by DegreeWorks is the knowledge source for specific requirements and completion.

Veterinary Nurse, AAS

About the Program

Curricula

This unique program combines one four-year curriculum with an Associate in Applied Science (AAS) and Bachelor of Science (BS) options. Students wanting only the Associate degree, or who have previously completed the general education college courses found in Year One of the bachelor's degree, begin in the clinical portion, or Year Two, of the program.

Although any student can compete to start in the Year Two associate degree program, high school students, or those without any college experience, are strongly advised to apply for the first year of the BS degree program. This allows students to obtain a science, math and general education background and develop college-level study skills prior to entering the intensive clinical portion of the curriculum. The student who completes the first year of the BS degree program but wishes to stop after completing the associate degree would complete the curriculum in three years (The first year of general education and two years, including two summers, of associate degree curriculum).

For more information, see the Veterinary Nursing website

Careers

As part of the veterinary team, registered veterinary technicians with an AAS degree perform a wide range of veterinary nursing, imaging, anesthesia, dental hygiene and diagnostic laboratory procedures in the practice setting.

Veterinary technologists (BS degree) add organizational skills and case/project management to their technical abilities. Possible career tracks for technologists include animal behavior counselors, specialty practice technologists, clinic/hospital team leaders, veterinary technology program educators, pharmaceutical sales, wildlife rehabilitation, zoo and shelter medicine.

Credentialed veterinary technicians are required to maintain continuing education according to state regulations. Information about continuing education programs is available through the Purdue University College of Veterinary Medicine's Office of Lifelong Learning.

The AAS and BS plans of study in veterinary technology are not intended to meet the requirements for application to veterinary school to become a Doctor of Veterinary Medicine (DVM).

Degree Requirements
70 Credits Required

Baccalaureate

Veterinary Nurse Completion, BSVN

About the Program

The Bachelor's (BSVN) Completion Program builds upon college credits and the associate degree equivalents earned during the AAS or AS Veterinary Nurse degree. This program is designed to enable graduates of accredited associate degree Veterinary Nurse programs to become veterinary nurses by earning a bachelor's degree.

In total, 127.5 credits hours are required for the Purdue BS degree in Veterinary Nursing. The BS Completion uses transfer credits from the associate degree to satisfy the competencies required for the second and third years of the BS degree, which are the clinical portion of the associate degree. In order to graduate from this program, students must complete a minimum of 32 credit hours of 30000 to 40000-level courses at the Purdue University campus, in addition to the BSVN degree requirements.

Limited class size necessitates a competitive admission process for available openings. If admitted, a credit evaluation will be completed to determine transfer credit that will be applied towards the degree.

Degree Requirements

Electives (2.5-5.5 credits)

AVMA-Accredited Associate Degree Program

A Veterinary Technology associate degree from an AVMA-accredited associate degree program satisfies the course requirements for the 2nd and 3rd years of the Purdue Veterinary Nursing BS Completion program. Students who have graduated from AVMA accredited proprietary programs whose credits do not transfer to Purdue will have departmental credits assigned to associate degree level Veterinary Nursing course work. Most graduates of AVMA-accredited proprietary programs come in with less than the required 70 credits. Students MUST work closely with advisor.

University Core Requirements

- Human Cultures Humanities
- Human Cultures Behavioral/Social Science
- Information Literacy
- Science #1
- Science #2
- Science, Technology, and Society
- Written Communication
- Oral Communication
- Quantitative Reasoning

Critical Course

The ♦ course is considered critical.

In alignment with the Degree Map Guidance for Indiana's Public Colleges and Universities, published by the Commission for Higher Education (pursuant to HEA 1348-2013), a Critical Course is identified as "one that a student must be able to pass to persist and succeed in a particular major. Students who want to be nurses, for example, should know that they are expected to be proficient in courses like biology in order to be successful. These would be identified by the institutions for each degree program".

Disclaimer
The student is ultimately responsible for knowing and completing all degree requirements.

The myPurduePlan powered by DegreeWorks is the knowledge source for specific requirements and completion.

**Veterinary Nursing, BSVN**

**About the Program**

**Curricula**

This unique program combines one four-year curriculum with an Associate in Applied Science (AAS) and Bachelor of Science (BSVN) options. Students wanting only the Associate degree, or who have previously completed the general education college courses found in Year One of the bachelor's degree, begin in the clinical portion, or Year Two, of the program.

Although any student can compete to start in the Year Two associate degree program, high school students, or those without any college experience, are strongly advised to apply for the first year of the BS degree program. This allows students to obtain a science, math and general education background and develop college-level study skills prior to entering the intensive clinical portion of the curriculum. The student who completes the first year of the BS degree program but wishes to stop after completing the associate degree would complete the curriculum in three years (The first year of general education and two years, including two summers, of associate degree curriculum).

For more information, see the Veterinary Nursing website.

**Careers**

As part of the veterinary team, registered veterinary nurses with an AAS degree perform a wide range of veterinary nursing, imaging, anesthesia, dental hygiene and diagnostic laboratory procedures in the practice setting.

Veterinary nurses (BSVN degree) add organizational skills and case/project management to their technical abilities. Possible career tracks for technologists include animal behavior counselors, specialty practice technologists, clinic/hospital team leaders, veterinary technology program educators, pharmaceutical sales, wildlife rehabilitation, zoo and shelter medicine.

Credentialed veterinary technicians are required to maintain continuing education according to state regulations. Information about continuing education programs is available through the Purdue University College of Veterinary Medicine's Office of Lifelong Learning.

The AAS and BSVN plans of study in veterinary nursing are not intended to meet the requirements for application to veterinary school to become a Doctor of Veterinary Medicine (DVM).

**Degree Requirements**

**127.5 Credits Required**

**Departmental/Program Major Courses (87 credits)**

Courses must be taken in specified order.
• BMS 23100 - Anatomy For Veterinary Technicians
• BMS 23200 - Physiology For Veterinary Technicians
• BMS 23300 - Introduction To Pharmacology For Veterinary Technicians
• BMS 33100 - Pharmacology For Veterinary Technicians
• CPB 25500 - Clinical Pathology For Veterinary Technicians
• CPB 35100 - Microbiology For Veterinary Technicians
• CPB 35200 - Parasitology For Veterinary Technicians
• CPB 46400 - Clinical Toxicology For Veterinary Technology
• CPB 48000 - Seminar In Animal Welfare And Human-Animal Interaction
• VCS 22100 - Veterinary Nursing Techniques For The Normal Animal (SA & LA)
• VCS 22200 - Dentistry For The Veterinary Technician
• VCS 22300 - Surgical Nursing And Operating Room Protocols
• VCS 22400 - Small Animal Nursing I
• VCS 22500 - Large Animal Nursing I
• VCS 22600 - Principles Of Anesthesia
• VCS 22800 - Small And Large Animal Well Animal Nutrition
• VCS 25100 - Introduction To Diagnostic Imaging For The Veterinary Technician
• VCS 25200 - Diagnostic Imaging For Veterinary Technicians
• VCS 32100 - Large Animal Nursing II
• VCS 32200 - Small Animal Nursing II
• VCS 41800 - Applied Small Animal Behavior
• VCS 46700 - Diagnostic Instrumentation
• VM 20100 - Introduction To Veterinary Technology
• VM 24100 - Safety, Prevention And Public Health
• VM 24200 - Integrations I
• VM 24300 - Clinic Rotations I
• VM 24400 - Clinical Rotations II
• VM 24900 - Clinical Rotations III
• VM 32300 - Laboratory Animals And Nursing Of Non-Traditional Pets
• VM 34200 - Integrations II
• VM 34300 - Clinical Rotations IV
• VM 34400 - Clinic Rotations V
• VM 34500 - Management I
• VM 39000 - Practicum ♦ or
• VM 41001 - International Practicum
• VM 42500 - Veterinary Technician Grand Rounds ♦ Must be taken 4 times
• VM 44100 - Occupational And Public Health For Veterinary Technicians
• VM 44200 - Management II
• VM 44300 - Clinic Rotations VI
• VM 44500 - Veterinary Technology Senior Project ♦
• Veterinary Nursing Selectives -

Veterinary Medicine Companion Animal Track

Companion Animal Track (48 credits)

Required Track Courses (30 credits)

- VCS 86000 - Emergency Medicine/ICU
- VCS 86100 - Small Animal Medicine I
- VCS 86201 - Small Animal Surgery-Soft Tissue I
- VCS 86202 - Small Animal Surgery - Orthopedic
- VCS 86502 - Large Animal Medicine I
- VCS 86600 - Large Animal Surgery I
- VCS 87201 - Clinical Veterinary Anesthesiology
- VCS 89100 - Diagnostic Imaging
- VCS 89500 - Veterinary Teaching Hospital Practicum
- CPB 88501 - Necropsy I
- CPB 88502 - Microbiology I
- CPB 88503 - Clinical Pathology I
- VM 81000 - Veterinary Externship

Medical or Surgery - Choose One (3 credits)

May also be taken as 'Additional Selectives'

- VCS 87100 - Small Animal Medicine II
- VCS 87502 - Large Animal Medicine II
- VCS 87600 - Large Animal Surgery II
Small Animal or Equine Practice - Choose One (3 credits)

May also be taken as 'Additional Selectives'

- VCS 86001 - Small Animal Emergency And Critical Care
- VCS 86300 - Small Animal Community Practice
- VCS 86700 - Equine Community Practice I

Additional Selectives (12 credits)

- CPB 88300 - Public Health
- CPB 88400 - Laboratory Animal Medicine
- CPB 88600 - Diagnostic Pathology
- CPB 88700 - Avian Medicine
- CPB 88900 - Clinical Pathology II
- VCS 82100 - Clinical Neurology
- VCS 86002 - Small Animal Emergency And Critical Care II
- VCS 86203 - Shelter Medicine And Surgery
- VCS 86400 - Dermatology/Behavior
- VCS 86800 - Equine Community Practice II
- VCS 87000 - Clinical Cardiology
- VCS 87102 - Oncology I
- VCS 87104 - Clinical Investigation In Oncology II
- VCS 87203 - Small Animal Surgery - Orthopedic II
- VCS 88500 - Large Animal Medicine III
- VCS 88600 - Large Animal Surgery III
- VCS 89400 - Comparative Ophthalmology I
- VM 89000 - Topics In Veterinary Medicine
- VM 89100 - Special Topics In Veterinary Medicine Arranged
- VM 89401 - Clinical Rotation In Small Animal Medicine In Switzerland

Note:

Students are encouraged to take a vacation block, but a selective may be substituted. If you choose to substitute a selective for vacation, add the additional selective from the list.

Veterinary Medicine Equine Track

Equine Track (48 credits)

Required Track Courses (36 credits)

- VCS 86000 - Emergency Medicine/ICU
- VCS 86502 - Large Animal Medicine I
- VCS 87502 - Large Animal Medicine II
- VCS 88500 - Large Animal Medicine III
- VCS 86600 - Large Animal Surgery I
- VCS 86700 - Equine Community Practice I
- VCS 87201 - Clinical Veterinary Anesthesiology
- VCS 87600 - Large Animal Surgery II
- VCS 88600 - Large Animal Surgery III
- VCS 89100 - Diagnostic Imaging
- VCS 89500 - Veterinary Teaching Hospital Practicum
- CPB 88501 - Necropsy I
- CPB 88502 - Microbiology I
- CPB 88503 - Clinical Pathology I
- VM 81000 - Veterinary Externship

Additional Selectives (12 credits)

- CPB 88300 - Public Health
- CPB 88600 - Diagnostic Pathology
- CPB 88900 - Clinical Pathology II
- VCS 82100 - Clinical Neurology
- VCS 86001 - Small Animal Emergency And Critical Care
- VCS 86203 - Shelter Medicine And Surgery
- VCS 86400 - Dermatology/Behavior
- VCS 86800 - Equine Community Practice II
- VCS 89400 - Comparative Ophthalmology I
- VM 89000 - Topics In Veterinary Medicine
- VM 89100 - Special Topics In Veterinary Medicine Arranged

Note:

Students are encourage to take a vacation block but a selective may be substituted. If you choose to substitute a selective for vacation, add the additional selective.

**Veterinary Medicine Food Animal Track**

**Food Animal Track (48 credits)**

**Required Track Courses (27 credits)**

- VCS 86000 - Emergency Medicine/ICU
- VCS 86502 - Large Animal Medicine I
- VCS 87502 - Large Animal Medicine II

Department of Basic Medical Sciences

Overview

The Department of Basic Medical Sciences (BMS) offers graduate programs leading to the Master of Science (M.S.) and Doctor of Philosophy (Ph.D) degrees. The Department emphasizes integrative studies that are applicable to animal and human health. Discovery activities range from studies of molecular and cellular processes to studies of the whole animal, in areas of cell and tissue growth, differentiation, regeneration, and numerous aspects of cancer biology. BMS faculty currently have active research programs in the areas of cancer biology; musculoskeletal biomechanics and skeletal adaptation; neural development, mechanisms of injury and regeneration; tissue dynamic spectroscopy; cellular and molecular screening; and high throughput analysis of cell function. Our directory of faculty research interests describes in more detail the exciting research that is conducted in BMS.

Department of Comparative Pathobiology

Overview

Welcome to the Department of Comparative Pathobiology. Comparative Pathobiology is the study of disease phenomena basic to all species including humans, at the molecular, cellular, organismal and ecosystem level. Our faculty, staff and students are involved in research and learning in a variety of areas including pathobiology, infectious diseases and vaccines, cancer biology, nanomedicine, toxicology, disease surveillance and human-animal interactions.

Department of Veterinary Clinical Sciences

Overview

Welcome to the Department of Veterinary Clinical Sciences. The VCS department is one of three departments in the Purdue University College of Veterinary Medicine. Our mission is to educate members of the veterinary health care team and biomedical community, to create and communicate knowledge, and to provide outstanding clinical service for the citizens of Indiana and surrounding region.

The department offers graduate programs leading to the Master of Science (MS; thesis or non-thesis) and Doctor of Philosophy (PhD) degrees. We also provide excellent opportunities for Post-DVM students to further their training through specialty residency programs in anesthesiology, cardiology, diagnostic imaging, emergency and critical care medicine, large animal internal medicine, large animal surgery, neurology, oncology, ophthalmology, radiation oncology, small animal internal medicine, and small animal surgery.
