College of Education Overview

Mission Statement

The College of Education provides leadership through exemplary teaching, research and engagement while embracing collaboration, creativity, respect and diversity. The college's mission is to advance scientific discovery in both applied and scholarly learning; prepare students to become exceptional teachers and education professionals; and maximize educational outcomes through inspired teaching, research and public service.

To further its mission, the College of Education creates knowledge through innovative inquiry and superior scholarship; delivers a contemporary and innovative professional curriculum; empowers faculty, staff and students to effect professional, social and technological change in a global, multi-cultural and diverse society; engages in cross-disciplinary collaboration to seek solutions to critical educational challenges both locally and globally; informs educational programs and policy; and attracts and retains talented and diverse faculty, staff and students. Organization and Purpose

The College of Education consists of the Department of Curriculum and Instruction and the Department of Educational Studies.

The Department of Curriculum and Instruction offers undergraduate instruction in elementary education and social studies education as well as courses in teaching methods for all programs leading to initial teacher licensure offered at Purdue. At the graduate level, the department offers degree programs in curriculum studies, education for work and community, educational technology, literacy and language education, mathematics education, science education and social studies education. At the graduate degree level, the department prepares master teachers, curriculum specialists, teacher educators, educational researchers, instructional designers, educational technology specialists and university faculty members.

The Department of Educational Studies offers undergraduate-level and graduate-level instruction in counseling and development, cultural foundations, educational leadership, educational psychology, gifted education, measurement and research methods and special education. At the graduate degree level, the department prepares educational researchers; educational policy analysts; school principals and superintendents; counseling psychologists; school counselors; teacher educators; and specialists in gifted education, measurement and the social and philosophical foundations of education. There is a counseling psychology doctoral program accredited by the American Psychological Association and a school counseling master's program accredited by the Council for the Accreditation of Counseling and Related Educational Programs.

The College of Education offers the Bachelor of Arts (B.A.) degree with licensure majors in elementary education, social studies education and special education and two non-licensure, general education majors. All other Purdue undergraduates who seek teacher preparation are enrolled in the college that provides their academic major. Other information especially relevant to those wishing to pursue programs leading to teaching careers in secondary education may be found through the college in which the academic major is pursued. Specific offerings of the College of Education's curricula and degree requirements are listed in appropriate sections of this website. The two departments of the college offer both introductory and advanced work in various fields.

Department of Curriculum and Instruction

Overview

Welcome to the Department of Curriculum and Instruction (C&I)

We offer high quality learning programs to prepare education professionals for positions in schools, higher education, and the workplace. Undergraduates in C&I may enroll in programs leading to teacher licensure in elementary education or social studies education. At the graduate level, students may pursue advanced degrees in education disciplines including curriculum studies, education for work and community, educational technology, literacy and language education, mathematics education, science education, and social studies education.

Our faculty conducts research that links theory to practice leading to new discoveries in many aspects of the teaching and learning process across a wide variety of educational contexts. C&I serves the needs of society through engagement with our local, state, national, and international communities. We value collaboration, community, diversity, global perspectives, inquiry, and reflection, and we aspire to provide educational leadership in an increasingly diverse, interconnected, and technology-rich world.

Sincerely,
Phillip VanFossen
Head of the Department of Curriculum & Instruction

Mission Statement

We aspire to collaborate on issues associated with the teaching and learning process by linking theory and practice in a wide variety of educational contexts. We value community, collaboration, diversity, inquiry, and reflection.

We fulfill our mission by:

- Preparing education professionals for school, community, business, and government
- Providing educational experiences, built upon a common core of research and foundational knowledge, through innovative, coherent programs that include: diverse and field-based experiences, the infusion of technology, the integration of content and pedagogy, and ongoing assessment
- Fostering university-wide collaboration
- Reflecting diverse and international perspectives
- Engaging in teaching, inquiry, scholarship, service, and outreach activities

Baccalaureate

Elementary Education, BA

About the Program

Elementary Education reflects what is known about the best practices in teacher education and is aligned with state and national standards for elementary school teacher preparation. Professional courses are grouped together and taken sequentially in 6 semester blocks. Each block has an associated Theory into Practice (TIP) field experience that allows students to apply subject matter knowledge and best practices in school, university, and community settings. The Elementary Education Plan of Study outlines the required courses to complete the degree for licensure.

For more information about the degree program, visit the COE Office of Advising and Recruiting. For teacher licensure information, visit the Office of Professional Preparation and Licensure.

Summary of Program Requirements

The Summary of Program Requirements for Elementary Education is a comprehensive list of those categories which a student must fulfill in order to earn their degree. Unlike the full Detailed Program Requirements listed below, complete lists of selectives for any given category are not shown. These summaries are intended to be printer-friendly and less expansive in detail.

Department of Educational Studies

Overview

The Department of Educational Studies offers graduate degree programs and professional certification programs in counseling and development, educational foundations and administration, educational psychology, and special education, and an undergraduate degree program in special education. The Department also engages in scholarly research and development activities and performs continuing education and public service to individuals, groups, educational systems, government and other agencies.

Mission Statement

The Department of Educational Studies (EDST) seeks to contribute to the discovery and development of human potential in diverse learning environments. This mission is accomplished through the discovery, application, and dissemination of new knowledge centered on three key themes: We aim to develop future generations of innovative, engaged, and skilled education professionals through our high quality undergraduate and graduate programs. The department supports the mission of the College of Education and the goals and objectives of the college's strategic plan. We are committed to fostering a collaborative culture that values inquiry, diversity, and engagement among students, faculty, staff, and community as we move forward with our educational mission.

Baccalaureate

General Education: Curriculum and Instruction, BA (non-licensure)

About the Program

The curriculum and instruction major is for those interested in a career in the field of education but not necessarily classroom teaching. This major is non-teaching license program. It provides an educational leadership focus in an increasingly diverse, interconnected, and technology-rich world and values collaboration, community, diversity, global perspectives, inquiry, and reflection. Research on various aspects of educational practices is conducted and disseminated. A focus on theory-into-practice leads to new discoveries in the teaching and learning process across a wide variety of educational contexts. Sample signature areas of discovery include:

- Challenges of acquiring academic language for English language learners (ELLs).
- The Science Learning through Engineering Design (SLED) project.
- Study abroad and internationalization efforts by colleges and universities.
- Impact of technology on citizenship and citizenship education.
- Postsecondary learner's development of mathematics content knowledge.

Four strands run through and guide the program: diversity, technology, field experience, and performance assessment (including the use of electronic portfolios).

Summary of Program Requirements

The Summary of Program Requirements for General Education-Curriculum & Instruction (2015-16) is a comprehensive list of those categories which a student must fulfill in order to earn their degree. Unlike the full Detailed Program Requirements listed below, complete lists of selectives for any given category are not shown. These summaries are intended to be printer-friendly and less expansive in detail.

General Education: Educational Studies, BA (non-licensure)

About the Program

The educational studies major is for those interested in a career in the field of education but not necessarily classroom teaching. This major is a non-teaching licensure program that provides a strong background in educational theory, practice and research. Research is conducted and disseminated on varied educational aspects of teaching, learning, and human development through discovery, teaching and engagement activities. Sample signature areas of discovery include:

- Using assistive technology to support school-based and community-based instruction for students with special needs.

- Developing effective instructional strategies in mathematics problem solving for students with learning disabilities.
- Developing identification tools and pedagogical models for underserved gifted and talented populations including students with diverse cultural backgrounds and children who live in poverty.
- Supporting motivation for and learning of science in young children including children from diverse cultural backgrounds and those living in poverty.
- Supporting students' psychological well-being (e.g., coping with death and dying, suicide prevention, multicultural issues, adult attachment).

Four strands run through and guide the program: diversity, technology, field experience, and performance assessment (including the use of electronic portfolios).

Learning Sciences in Educational Studies, BA (non-licensure)

The Educational Studies Learning Sciences major is a non-licensure baccalaureate program that is designed to develop advanced knowledge and application of the science of learning in diverse educational settings and contexts. Graduates will learn to design and implement creative learning environments that:

- Are based on current theoretical knowledge and research on best practices
- Incorporate technological innovations in teaching and learning
- Support learning in both formal and informal settings such as schools, museums, and community settings
- Employ the principles of design-based educational research to study and evaluate educational practices and outcomes in formal and informal settings.

The program provides cross-disciplinary training, integrating knowledge across the fields of cognitive science, educational psychology, measurement and research methodology, sociology, and anthropology, curriculum and instruction. Graduates will receive strong training in designbased research methodologies and will be required to participate in structured practicum and internship experiences throughout their program. All students will be required to complete a capstone project for their graduation portfolio.

Summary of Program Requirements

The Summary of Program Requirements for Learning Sciences in Educational Studies (non licensure) is a comprehensive list of those categories which a student must fulfill in order to earn their degree. Unlike the full Detailed Program Requirements listed below, complete lists of selectives for any given category are not shown. These summaries are intended to be printer-friendly and less expansive in detail.

Special Education/Elementary Education, BA

Special Education meets the unique needs of individuals with disabilities by preparing professionals with the knowledge, disposition and skills necessary to effectively serve individuals with diverse needs. The undergraduate program is based on an inquiry framework that emphasizes (a) creating connections between subject matter knowledge and teaching, (b) valuing the diverse characteristics of students and the ability to address the needs of all students, and (c) understanding the contextual aspects of teaching (e.g., the organizational and policy context).

The program links courses with field experiences in partner school and non-school settings. Particular attention is given to specialized skills to meet the individual needs of students with disabilities - serving students in various school and community settings; developing Individualized Education Programs (IEPs); using assistive technology; and developing instructional material and environmental modifications. All of these competencies are beyond the knowledge required for general educators.

Dual Licensure Major (ELED/SPED). All undergraduate students entering the program in special education work towards dual licenses in elementary education AND special education with a focus on mild intervention (grades P-12). Upon successful completion of all requirements in this major, students are considered "highly qualified" teachers in elementary education and P-12 special education: mild intervention. This dual major is limited to 38 new students per year. Priority is given to applicants who initially select special education as their major.

Certificate

Collaborative Leadership Certificate

The undergraduate Certificate in Collaborative Leadership (CCL) is open to students campus-wide and consists of 3-credit bearing courses.

Collaborative leadership is the process through which leaders, guided by self-knowledge and interpersonal awareness, facilitate and empower the potential of diverse individuals and groups through enhanced understanding of factors such as individual motivation, interpersonal skills, and group dynamics.

"This series of three classes taught me things that no other classes at Purdue had offered. Now having graduated, I find that there are skills from these classes that I use on a daily basis. For example, reading body language, conflict management techniques, and how to have challenging conversations with others are what I use most frequently in my career. However, for my personal life, I also learned what it takes to not only be an effective mentor but also how to find an effective mentor for myself. I honestly believe that these courses will be of future benefit to students in any major." Darrian Petrucci

To become one tomorrow's leaders, students need to be *trained* in the interpersonal aspects of leadership. The *Certificate in Collaborative Leadership* uses highly experiential training to take students beyond management skills to:

1. team-building,
2. empowerment of others,
3. identifying and capitalizing on human resources to reach goals.

Students will learn leadership-related content, interpersonal skills, global awareness, diversity awareness, and mentoring while *experientially* interacting with peers from diverse disciplines and backgrounds, and first year college students or high school students who need role models-a powerful synergy!

Course Sequence and Descriptions:

Course 1: Collaborative Leadership: Listening

This experiential, case-based course focuses on integrated study of theories of human motivation and systems, working through how to have difficult conversations with colleagues, supervisors, and employees. Key feature of the course is ongoing recorded role-played scenarios, providing critiqued practice that focuses on how to best communicate with others in a variety of situations, settings, and roles.

Approved to meet Oral Communication (OC) foundational learning outcome

Course 2: Collaborative Leadership: Cross-Cultural Settings

In this course, students explore the cultural nuances of leadership in the United States as well as around the world. This course will include impact of globalism as a context for leadership, conflict resolution in a global environment, and other important factors that impact culturally diverse or global teams. Method of course delivery will include utilization of experiential activities and innovative technology to learn about and engage with culturally diverse individuals.

Approved to meet Human Cultures: Behavioral Social Sciences (BBS) foundational learning outcome

Course 3: Collaborative Leadership: Mentoring

In this service-learning course, students learn theories of mentoring, including both the one-on-one, "grooming" approach and the networking approach to mentoring. Students have the opportunity to critically evaluate their personal experiences with formal and informal mentors, identify areas where they wish to receive mentoring, and serve as part of a network mentoring team to first-year students at Purdue University or high school students in the Lafayette area.

Pre-requisites and Requirements for Admission to CL Courses

This certificate is open to all students at Purdue. Although not an official prerequisite-students may benefit from taking Course 1, *Collaborative Leadership: Listening* prior to taking either of the other two courses. Students do not have to be formally enrolled in the certificate program in order to take courses, but completion of all three courses is required in order to receive the Certificate in Collaborative Leadership.
