Mission Statement

The College of Education provides leadership through exemplary teaching, research and engagement while embracing collaboration, creativity, respect and diversity. The college's mission is to advance scientific discovery in both applied and scholarly learning; prepare students to become exceptional teachers and education professionals; and maximize educational outcomes through inspired teaching, research and public service.

To further its mission, the College of Education creates knowledge through innovative inquiry and superior scholarship; delivers a contemporary and innovative professional curriculum; empowers faculty, staff and students to effect professional, social and technological change in a global, multi-cultural and diverse society; engages in cross-disciplinary collaboration to seek solutions to critical educational challenges both locally and globally; informs educational programs and policy; and attracts and retains talented and diverse faculty, staff and students.

Organization and Purpose

The College of Education consists of the Department of Curriculum and Instruction and the Department of Educational Studies.

The Department of Curriculum and Instruction offers undergraduate instruction in elementary education and social studies education as well as courses in teaching methods for all programs leading to initial teacher licensure offered at Purdue. At the graduate level, the department offers degree programs in curriculum studies, education for work and community, educational technology, literacy and language education, mathematics education, science education and social studies education. At the graduate degree level, the department prepares master teachers, curriculum specialists, teacher educators, educational researchers, instructional designers, educational technology specialists and university faculty members.

The Department of Educational Studies offers undergraduate-level and graduate-level instruction in counseling and development, cultural foundations, educational leadership, educational psychology, gifted education, measurement and research methods and special education. At the graduate degree level, the department prepares educational researchers; educational policy analysts; school principals and superintendents; counseling psychologists; teacher educators; and specialists in gifted education, measurement and the social and philosophical foundations of education. There is a counseling psychology doctoral program accredited by the American Psychological Association.

## Department of Curriculum and Instruction

### Overview

**Welcome to the Department of Curriculum & Instruction (C&I)**

We offer high quality learning programs to prepare education professionals for positions in schools, higher education, and the workplace. Undergraduates in C&I may enroll in programs leading to teacher licensure in elementary education or social studies education. In addition, C&I offers courses in teaching methods for all programs leading to initial teacher licensure at Purdue. At the graduate level, students may pursue advanced degrees in education disciplines including curriculum studies, education for work and community, educational technology, literacy and language education, mathematics education, science education, and social studies education.

Our faculty conducts research that links theory to practice leading to new discoveries in many aspects of the teaching and learning process across a wide variety of educational contexts. C&I serves the needs of society through engagement with our local, state, national, and international communities. We value collaboration, community, diversity, global perspectives, inquiry, and reflection, and we aspire to provide educational leadership in an increasingly diverse, interconnected, and technology-rich world.

Sincerely,
Janet M. Alsup
Head of the Department of Curriculum & Instruction

### Mission Statement

We aspire to collaborate on issues associated with the teaching and learning process by linking theory and practice in a wide variety of educational contexts. We value community, collaboration, diversity, inquiry, and reflection.

We fulfill our mission by:

- Preparing education professionals for school, community, business, and government
- Providing educational experiences, built upon a common core of research and foundational knowledge, through innovative, coherent programs that include: diverse and field-based experiences, the infusion of technology, the integration of content and pedagogy, and ongoing assessment
- Fostering university-wide collaboration
- Reflecting diverse and international perspectives
- Engaging in teaching, inquiry, scholarship, service, and outreach activities

Elementary Education, BA

About the Program

Elementary Education reflects what is known about the best practices in teacher education and is aligned with state and national standards for elementary school teacher preparation. Professional courses are grouped together and taken sequentially in 6 semester blocks. Each block has an associated Theory into Practice (TIP) field experience that allows students to apply subject matter knowledge and best practices in school, university, and community settings. The Elementary Education plan of study outlines the required courses to complete the degree for licensure.

For more information about the degree program, visit the COE Office of Advising and Recruiting. For teacher licensure information, visit the Office of Teacher Education and Licensure.

Critical Course

The course is considered critical.

In alignment with the Degree Map Guidance for Indiana's Public Colleges and Universities, published by the Commission for Higher Education (pursuant to HEA 1348-2013), a Critical Course is identified as “one that a student must be able to pass to persist and succeed in a particular major. Students who want to be nurses, for example, should know that they are expected to be proficient in courses like biology in order to be successful. These would be identified by the institutions for each degree program”.

Disclaimer

The student is ultimately responsible for knowing and completing all degree requirements.

The myPurduePlan powered by DegreeWorks is the knowledge source for specific requirements and completion.

General Education: Curriculum and Instruction, BA (non-licensure)

About the Program

The curriculum and instruction major is for those interested in a career in the field of education but not necessarily classroom teaching. This major is non-teaching license program. It provides an educational leadership focus in an increasingly diverse, interconnected, and technology-rich world and values collaboration, community, diversity, global perspectives, inquiry, and reflection. Research on various aspects of educational practices is conducted and disseminated. A focus on theory-into-practice leads to new discoveries in the teaching and learning process across a wide variety of educational contexts. Sample signature areas of discovery include:

- Challenges of acquiring academic language for English language learners (ELLs).
- The Science Learning through Engineering Design (SLED) project.
- Study abroad and internationalization efforts by colleges and universities.
- Impact of technology on citizenship and citizenship education.
- Postsecondary learner’s development of mathematics content knowledge.

The General Education: Curriculum & Instruction Plan of Study outlines the required courses to complete the degree. For more information about the degree program, visit the COE Office of Advising and Recruiting.

Social Studies Education, BA
About the Program

Social Studies Education reflects the best practices in teacher education and is aligned with state and national standards to prepare individuals to teach social studies at the secondary level. Students take courses in three areas: Historical Perspectives, and two additional areas chosen from Economics and/or Government and Citizenship, or Psychology or Sociology. Professional courses are grouped together and taken sequentially in 2 semester blocks. Each block has an associated Theory into Practice (TIP) field experience. The Social Studies Education Plan of Study outlines the required courses to complete the degree for licensure. **Critical Course**

The ♦ course is considered critical.

In alignment with the Degree Map Guidance for Indiana's Public Colleges and Universities, published by the Commission for Higher Education (pursuant to HEA 1348-2013), a Critical Course is identified as ‘one that a student must be able to pass to persist and succeed in a particular major. Students who want to be nurses, for example, should know that they are expected to be proficient in courses like biology in order to be successful. These would be identified by the institutions for each degree program”.

**Disclaimer**

The student is ultimately responsible for knowing and completing all degree requirements.

The myPurduePlan powered by DegreeWorks is the knowledge source for specific requirements and completion.

**Department of Educational Studies**

**Overview**

*Welcome to the Department of Educational Studies (EDST)*

Cast against a vibrant history of innovation, research, teaching, and learning that continues to contribute to the enhancement of human potential in a wide variety of learning environments, our internationally recognized faculty offer world-class opportunities for study that emphasizes discovery of new knowledge. Amidst a collaborative, nurturing atmosphere in which professors know students by name, educational experiences are targeted at cutting-edge advances from the very people who have discovered them.

The EDST faculty is comprised of distinguished teachers and scholars who investigate, apply, practice, and disseminate information related to: the education of diverse learners; science, technology, engineering, and mathematics as well as the liberal arts; and effective instruction. In addition, EDST offers undergraduate majors that encourage students to work alongside faculty, who emphasize hands-on and exploratory experiences in Learning Sciences and Special Education.
Our graduates historically are successful in a diversity of positions in both the private and public sector. Depending on the program completed, graduates are employed as college and university faculty, researchers, consultants, educational research analysts, program evaluators, assessment specialists, clinicians, or therapists.

Whether you are a hard-working undergraduate, an ambitious graduate student, or a distinguished alumnus, we value your interest in EDST!

Warmly,
F. Richard Olenchak, Ph.D.
Professor and Educational Studies Department Head

Mission Statement

The Department of Educational Studies (EDST) seeks to contribute to the discovery and development of human potential in diverse learning environments. This mission is accomplished through the discovery, application, and dissemination of new knowledge centered on three key themes: We aim to develop future generations of innovative, engaged, and skilled education professionals through our high quality undergraduate and graduate programs. The department supports the mission of the College of Education and the goals and objectives of the college's strategic plan. We are committed to fostering a collaborative culture that values inquiry, diversity, and engagement among students, faculty, staff, and community as we move forward with our educational mission.

Baccalaureate

General Education: Educational Studies, BA (non-licensure)

About the Program

The educational studies major is for those interested in a career in the field of education but not necessarily classroom teaching. This major is a non-teaching licensure program that provides a strong background in educational theory, practice and research. Research is conducted and disseminated on varied educational aspects of teaching, learning, and human development through discovery, teaching and engagement activities. Sample signature areas of discovery include:

- Using assistive technology to support school-based and community-based instruction for students with special needs.
- Developing effective instructional strategies in mathematics problem solving for students with learning disabilities.
- Developing identification tools and pedagogical models for underserved gifted and talented populations including students with diverse cultural backgrounds and children who live in poverty.
- Supporting motivation for and learning of science in young children including children from diverse cultural backgrounds and those living in poverty.
- Supporting students' psychological well-being (e.g., coping with death and dying, suicide prevention, multicultural issues, adult attachment).

The General Education: Educational Studies Plan of Study outlines the required courses to complete the degree. For more information about the degree program, visit the COE Office of Advising and Recruiting.

Critical Course

The ♦ course is considered critical.

In alignment with the Degree Map Guidance for Indiana's Public Colleges and Universities, published by the Commission for Higher Education (pursuant to HEA 1348-2013), a Critical Course is identified as "one that a student must be able to pass to persist and succeed in a particular major. Students who want to be nurses, for example, should know that they are expected to be proficient in courses like biology in order to be successful. These would be identified by the institutions for each degree program".

Disclaimer

The student is ultimately responsible for knowing and completing all degree requirements.

Special Education/Elementary Education, BA
About the Program

Special Education meets the unique needs of individuals with disabilities by preparing professionals with the knowledge, disposition and skills necessary to effectively serve individuals with diverse needs. The undergraduate program is based on an inquiry framework that emphasizes (a) creating connections between subject matter knowledge and teaching, (b) valuing the diverse characteristics of students and the ability to address the needs of all students, and (c) understanding the contextual aspects of teaching (e.g., the organizational and policy context).

The program links courses with field experiences in partner school and non-school settings. Particular attention is given to specialized skills to meet the individual needs of students with disabilities - serving students in various school and community settings; developing Individualized Education Programs (IEPs); using assistive technology; and developing instructional material and environmental modifications. All of these competencies are beyond the knowledge required for general educators.

A dual licensure major, Special Education: Mild Intervention and Elementary Education, graduate is qualified to teach children who experience mild emotional, learning, or intellectual disabilities, including children with high functioning autism, at the preschool through grade 12 levels, P-12 and Elementary Education kindergarten through grade 6 levels, K-6. Four strands run through and guide the program: diversity, technology, field experience and performance assessment, including the use of electronic portfolios. The Special Education/Elementary Education Plan of Study outlines the required courses to complete the degree for licensure.

For more information about the degree program, visit the COE Office of Advising and Recruiting. For teacher licensure information, visit the Office of Teacher Education and Licensure.

Critical Course

The • course is considered critical.

In alignment with the Degree Map Guidance for Indiana's Public Colleges and Universities, published by the Commission for Higher Education (pursuant to HEA 1348-2013), a Critical Course is identified as "one that a student must be able to pass to persist and succeed in a particular major. Students who want to be nurses, for example, should know that they are expected to be proficient in courses like biology in order to be successful. These would be identified by the institutions for each degree program".

**Special Education/Mild Intervention P-12, BA**

### About the Program

Special Education meets the unique needs of individuals with disabilities by preparing professionals with the knowledge, disposition and skills necessary to effectively serve individuals with diverse needs. The undergraduate program is based on an inquiry framework that emphasizes (a) creating connections between subject matter knowledge and teaching, (b) valuing the diverse characteristics of students and the ability to address the needs of all students, and (c) understanding the contextual aspects of teaching (e.g., the organizational and policy context).

The program links courses with field experiences in partner school and non-school settings. Particular attention is given to specialized skills to meet the individual needs of students with disabilities - serving students in various school and community settings; developing Individualized Education Programs (IEPs); using assistive technology; and developing instructional material and environmental modifications. All of these competencies are beyond the knowledge required for general educators.

A Special Education: Mild Intervention graduate is qualified to teach children who experience mild emotional, learning, or intellectual disabilities, including children with high functioning autism, at the preschool through grade 12 levels, P-12. Four strands run through and guide the program: diversity, technology, field experience and performance assessment, including the use of electronic portfolios. The Special Education: Mild Intervention Plan of Study outlines the required courses to complete the degree for licensure.

For more information about the degree program, visit the COE Office of Advising and Recruiting. For teacher licensure information, visit the Office of Teacher Education and Licensure.
